CRYO SURGICAL SYSTEM

Using Nitrous Oxide (N₂O)

for Gynaecology, General Surgery,
Otorhinolaryngology & Dermatology.

BASCO-CRYOS UNIQUE FEATURES & BENEFITS

- Made with high quality Hypodermic needles-ensures smooth flow of cryogenic gas and lasts longer.
- Equipped with specially designed 'Silencer'-enables quieter operation.
- Body made of ABS Plastic, in attractive colours - Aesthetically appealing.
- Specially designed Probes for different specific end uses - enables wide usage of same instrument for different specialities.
- Attractive light-weight carrying case-easy portability.
- Available with ON-OFF Control Instrument also, as additional facility.

SUPER DELUXE WITH ON-OFF CONTROL SYSTEM MODEL : 004B

CRYO 004B ON-OFF SUPER DELUXE

- This enables us to cut-off the gas line (flow) without closing the cylinder while we interchange the probe.
- Cleaning the inner hypodermic needle will be much easier, thus saving valuable time.
- CO₂ gas can be used in the equipment very conveniently, since removal of any clog will be very simple.
